Subject: U.S. EPA, Region 5, Request Pursuant to Section 308 of the Clean Water Act, 33 U.S.C. § 1318(a), Docket No. V-404-308-14-04

Greg, as discussed today, FirstEnergy is collecting the information responsive to EPA's request received on November 18, 2013 regarding the Port Clinton, Ohio firing range utilized by security personnel from our Davis Besse power plant. This email requests a 30-day extension to January 17, 2014 to complete and submit our response to EPA's request. The additional 30 days is necessary to complete our review of all potential sources of information, including electronically stored information. Please call me at 330-761-4205 if you have any questions regarding this 30-day extension request.
